## 👤 PROFILE

Adaptable Junior Front-End Developer, Info Science grad with diverse skills and experience in React, JavaScript, Java, HTML, CSS, PHP & more. Constantly learning to stay current in the ever-evolving coding world.

## 🎓 EDUCATION

Addis Ababa University, Addis Ababa

2019 — 2023

information science graduate

## ★ EXPERIENCE

Student Clearance System, Addis Ababa

November 2022 — June 2023

A multi-login system for students, department heads, and admins. Students request clearance, track progress; heads and admin review and approve/decline. This was done using React, MySQL and node.js. I was the UI developer for this project.

Employee management System, Addis Ababa University

May 2022 — June 2022

A comprehensive web-based system utilizing HTML, CSS, JavaScript, and PHP for streamlined employee and admin functionalities. Enables leave management, employee tracking, and profile editing for efficient workdays.

Student Management System, Addis Ababa

September 2021 — November 2021

The system has two logins: one for admin and one for employees. Essentially, the system allows for student enrollment, student registration, and the preparation of rosters for each grade and section. This system was done using Java and MySQL. I was the UI developer in this project.

Kids Mathematics Quiz, Addis Ababa

March 2022 — April 2022

The kid-friendly Math Quiz app prepares children for tests with various question types - addition, subtraction, multiplication, and division. Random numbers minimize repetition, and kids can check their results. Built with React-Native. I was the UI developer in the project.

House Renting Kiray App, Addis Ababa

May 2022 — June 2022

A user-friendly house rental app with distinct user and landlord logins. Which streamlines property search, communication, and rental processes. Developed using React-Native and PHP for efficiency and convenience. I was the API developer in this project.

### Event Planning Website Template, Addis Ababa

June 2023 — July 2023

The responsive website doesn't have a specific function, but it showcases some cool features. I created it to improve my UI design skills. It was developed using HTML, CSS, and Tailwind CSS.

### Hot Spot Restaurant , Addis Ababa

November 2022 — December 2022

A responsive and parallax website which doesn't have a function, But it's with showcases some cool features to improve my UI design skills. It was developed using HTML, CSS and Tailwind-CSS.

## COURSES

### Javascript, Scrimba

February 2022 — February 2022

### Career development & Guidance, Dereja

September 2023 — Present
